

P053 FINAL CLOSEOUT EVIDENCE

S3 Artifacts Inventory Report

This static report captures the retained evidence in `s3://p053-mlflow-artifacts`, the post-Day40 schedule leak, model artifacts, object versions, and the remaining AWS cost posture after the project was stopped.

Generated: 2026-07-17 00:47:53 UTC **Region:** us-west-2 **Workflow hard-stop:** commit `8b72d8e`.

CURRENT S3 OBJECTS**105**In `s3://p053-mlflow-artifacts`**CURRENT S3 SIZE****4.47 GB**

Latest object versions only

OBJECT VERSIONS**387**

12 delete markers

ALL-VERSION SIZE**6.86 GB**

Includes noncurrent versions

DAY ARTIFACTS FOUND**45**

Current day-level prefixes

ACCIDENTAL EXTRAS

5

Days above 40 retained for now

Big-bill status: EC2 and RDS compute are stopped, NAT gateways are absent, the daily GitHub Actions cron is disabled, and expensive workflow steps are guarded by `should_run` . This stops the recurring production-run spend path. Small residual charges continue while evidence resources are retained.

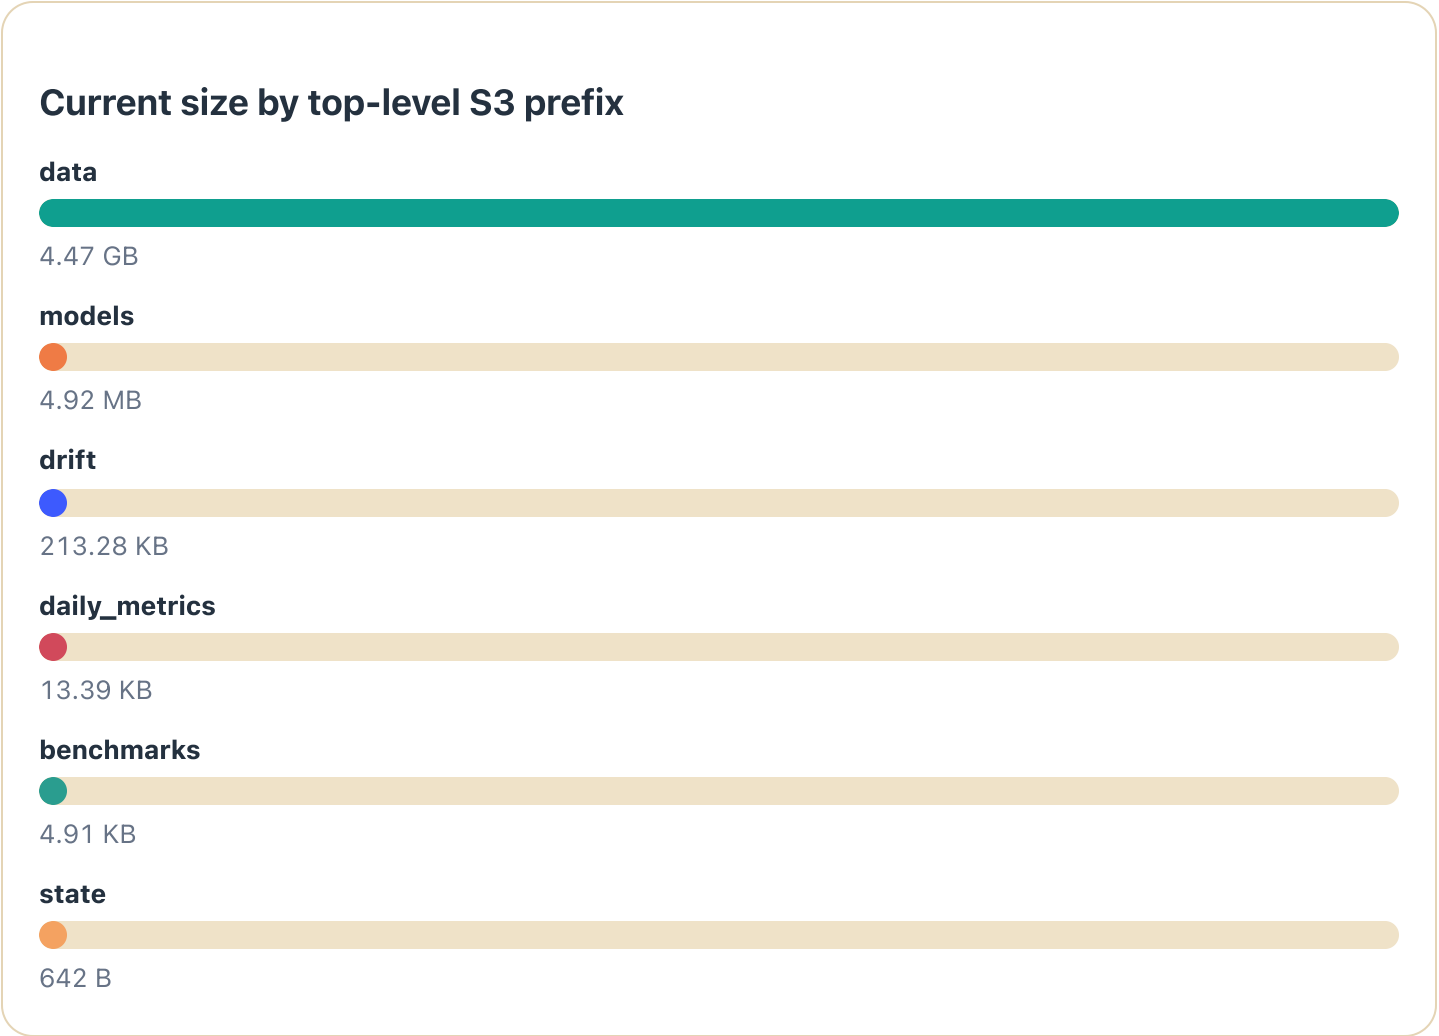

Important incident: Days 41-45 are real unintended artifacts. The Day 40 completion check used `exit 0` inside a single GitHub Actions step, so the job continued to AWS-starting steps. The workflow is now disabled remotely and guarded in source.

Pipeline State

FIELD	VALUE
current_day	46
status	complete
last_run	2026-07-16T02:05:57Z
last_completed_day	45
champion_model	s3://p053-mlflow-artifacts/models/day30_v2_retrained.pt
created	2026-06-03T14:51:22.813571Z
note	Day 1 training complete on EC2 T4. Days 2-40 run via GitHub Actions daily cron.
last_run_note	Day 31 failed: spark_etl zombie (OOM). Fixed: local[1]+1g+retries. Re-run pending.
champion_updated_day	30

FIELD	VALUE
champion_update_note	Manually promoted day30_v2_retrained.pt (from validated A100 simulation). Production retrain re-run for Day 30 will further validate and may update.

AWS Resource Cost Posture

AREA	IDENTIFIER/COUNT	STATE	CLASS	COST NOTE
EC2	i-0562654a22d44346f	stopped	g4dn.xlarge	Stopped compute means no g4dn runtime charge.
Attached EBS	125 GiB	billable	gp3 volume(s)	Kept as evidence; delete/terminate only with explicit approval.
RDS	p053-mlflow-db	stopped	db.t3.micro	Storage and snapshots remain billable while retained.
RDS snapshots	21	billable	automated	Can be removed only during destructive cleanup.
NAT gateways	0	none active	available/pending	No NAT runtime cost found in this audit.
Public IPv4/EIP	1	billable if allocated/associated	EC2 address inventory	One associated public IPv4/EIP was retained in the July 17 audit.

AREA	IDENTIFIER/COUNT	STATE	CLASS	COST NOTE
ECR repos	1	retained	project repositories	Small storage cost if images remain.
